Case Study

Solution for Military, Navy

Background

Navy displays plan for an emergency: GALMOBILE is part of his capabilities

Challenge

The main challenges is supplying safe drinking water for the operational forces. The strict regulations in most armies, along with difficult access in the field, and on top of that the difficulty to transport military equipment + water bottles, are making the challenge more complex.

Solution by GALMOBILE™

- 💧 Transferability- System's ability to move in difficult access conditions.
- 💧 Control & Analyzers for continuous and stable supply drinking water
- 💧 Approved according to Ministry of Defense, which is the strictest regulation.
- 💧 Have been dropped and transported by helicopter or by sea.
- 💧 Plug & Play configuration
- 💧 Lightweight - 1,1 ton

Results of using the GALMOBILE™

Parameter	Description
Reducing logistics costs	Eliminating the need to carry water to the field
Saving time	Fast disengage, Easy to maintain in deep darkness conditions
Significant Risk reduction	Drinking water according to Ministry of Defense
Weight reduction	1,1 ton
